

Beavercreek High School

Program of Studies

2018 – 2019

Mr. George Caras, Principal
Mr. Garey Martin, Assistant Principal
Ms. Yvonne Edwards, Assistant Principal
Ms. Laura Bailey, Assistant Principal

To The Parents and Students of Beavercreek High School:

The information contained in this booklet is to assist you in planning your educational program at Beavercreek High School. This booklet is designed to provide the information for cooperative planning to meet your educational objectives. You are invited to call and arrange a conference with your counselor concerning your educational program. Choose your program of study wisely with consideration for abilities, interests, and goals.

Mr. Nic Black, Counselor (A - F)
Mrs. Julie Smigel, Counselor (G - M)
Mrs. Susan Laws, Counselor, Dept. Head & (N-T)
Mrs. Robyn Duley, Counselor, Special Programs & (U - Z)
Mrs. Kristi Massey, College/CCP Counselor

Beavercreek High School Mission Statement

Beavercreek High School, with a strong commitment to making education the priority of the entire school community, recognizes the intellectual and cultural uniqueness of its students.

The purpose of Beavercreek High School is to promote the intellectual, social, physical, and creative development of all its students as well as to encourage development of the opportunity to become involved in decisions affecting their lives. Professional staff will accommodate individual needs and goals of all students by providing a diverse curriculum, current materials and media, a variety of extra-curricular activities, and an atmosphere that encourages mutual respect.

Credits Recommended for College Preparatory Students

English Language Arts	4 credits
Social Studies	4 credits
Mathematics	4 credits (including Algebra, Geometry, & Algebra II)
Science	3 credits
World Language	3 credits (the same language)
Fine Arts	1 credit (Art, Music, Drama)

These are the high school credits required by most colleges and universities. Most colleges also require either the ACT or SAT for admission.

Fees

Many courses have a charge for lab fees and/or other materials. Most of these costs are listed near the course descriptions; however, there may be additional costs associated with some specific classes. Other fees include a \$40 for graduation.

Course fees are approved at the June School Board meeting and are subject to change.

BEAVERCREEK HIGH SCHOOL GRADUATION REQUIREMENTS

Year of Graduation **2019 - 2022**

Total Credits

Required for Graduation **22**

Required Credits

English Language Arts (ELA) **4**

English 9, English 10, English 11, English 12 or AP

Science **3**

Physical Science, Biology, and Advanced Science

Math **4**

Algebra I, Geometry, Algebra II, and an elective

Social Studies **4**

World History, U.S. History, Government and an elective

Health **½**

Physical Education **½**

2 semester classes

Fine Arts **1**

Choose from:

- Art classes taken in grades 9–12
- Music classes taken in grades 9-12
- Acting I/II taken in grades 9-12

Electives **5**

Elective credits are needed to complete total credit requirements for graduation.

Electives should be from a combination of the following areas:

- Business
- Practical Arts
- Fine Arts
- World Language
- Electives from core areas

*Completion of 18 “End of Course Tests” required by the State of Ohio Department of Education.

State Testing Information

Starting with the Class of 2018, all students are required to take the following seven tests:

- *ELA I (English 9) & ELA II (English 10)*
- *Algebra I & Geometry*
- *Biology*
- *American History & Government*

State Tests scores range from 1 to 5 points as outlined below:

PERFORMANCE LEVEL	GRADUATION POINTS
Advanced	5
Accelerated	4
Proficient	3
Basic	2
Limited	1

GRADUATION POINTS

One pathway that students may use to meet the test requirement for graduation is to accumulate 18 out of a possible 35 points on their seven end of course exams. In addition to acquiring 18 points, students must meet certain minimum points in specific content areas as follows:

- Students must earn at least 4 combined points in ELA I (English 9) & ELA II (English 10)
- Students must earn at least 4 combined points in Algebra I & Geometry
- Student must earn at least 6 combined points in Science (Biology) and Social Studies (American History and Government) tests
- This means that students can earn Limited and/or Basic scores in some areas but still reach the required 18 points for graduation.
- Students will have the opportunity to retake any test and gain a higher score every fall and every spring through the fall of their senior year of high school.

COLLEGE AND CAREER READINESS TEST

Another option that students may use is a college and career readiness test. Our district has chosen to use the ACT for this purpose. Beaver Creek High School will be giving all junior students the ACT on February 27, 2018. There will be no cost to students.

Students must earn “remediation free” scores in each of the three sub score areas, two in English language arts and one in Mathematics. These scores are listed below.

English Language Arts*:

English sub score of 18 or higher

Reading sub score of 22 or higher

Mathematics:

Mathematics sub score of 22 or higher

**These scores are subject to change in the future*

Each student may use the highest score in each sub score from multiple administrations of the ACT to meet the student’s graduation requirement option. This would include the state-funded administration in the spring of their junior year, and additional attempts that students take and fund through non-state resources during their academic years.

Please remember that these requirements are **in addition to** obtaining the credits required by the State of Ohio and Beaver Creek City Schools.

Instructions for Registration

CLASS LEVEL EXPLANATION

English Language Arts, World languages, mathematics, science, and social studies courses are divided into levels of instruction: standard, scholarship, honors, and advanced placement (AP). The purpose of this division is to allow the student to work commensurate with the student's ability and/or prepare to take an AP examination. The grading scale is the same for all levels, but the quality points for scholarship courses are increased by .5 points. Honors and AP courses are increased by one point when figuring GPA.

The standard class is that of the traditional course. Standard class work is fully acceptable as college preparatory units of credit.

The scholarship and honors courses move at a more rapid pace than the standard offerings. Special projects may be required.

The Advanced Placement (AP) courses are designed to prepare students who wish to take the Advanced Placement Exam for the particular subject. The AP Exam permits students to omit and/or to gain credit for freshmen level courses at most colleges and universities. The fee for the exam is approximately \$95 and is to be paid by the student. The student who completes an AP course is expected to take the examination.

MINIMUM STUDENT LOAD

Students must carry at least SIX (6) COURSES each semester. Exceptions require permission of the principal.

CLASS RANK

Class rank is a numerical rank assigned to senior students according to the cumulative grade point average of all work given a letter grade in all high school courses. The rank is determined after six semesters. Class rank will be recalculated at the end of seven semesters for the top seniors.

CREDIT

Normally one credit is received for a subject that meets one period each day for five days each week of the school year. Exceptions are listed in the course description.

SCHEDULE CHANGES

All schedule changes for the 2018-2019 school year must be made prior to May 25, 2018. After this date, class changes can only be made after all other options have been considered and the student, parent, teacher, and administrator all agree that a change is in the best interest of the student. Request changes based on personality conflicts with teachers or poor performance due to lack of effort will not be allowed.

ATHLETIC/CO-CURRICULAR ELIGIBILITY

Students in grades 9-12 must maintain a minimum grade point average of 1.5 with no more than one failing grade. All courses must be weighed equally and awarded points as follows:

$$A = 4, B = 3, C = 2, D = 1, F = 0$$

Students must be enrolled in at least six classes, at least five of which must be full-year (or equivalent) full-credit courses. It is also a requirement that students receive passing grades in five full credit courses or their equivalent.

(Note: Two individual semester academic classes paired with one another in the first and second semester qualify as a full year course.)

This policy shall apply to students participating in non-graded, interscholastic, extracurricular activities sponsored by the Beavercreek City School District. It includes, but is not limited to, all school athletic teams in grades 9-12, and all other groups or teams that compete against other schools, such as choral and instrumental music, dance team, chess team, speech and debate, and all competitive academic teams.

CREDIT FLEXIBILITY / EDUCATIONAL OPTIONS

Credit Flexibility is available to meet students' needs of interest. It is designed to replace a course due to schedule conflicts or other certain provisions that make it impossible to schedule during a traditional school day.

All credit flex and educational options require written application and a detailed educational plan including instructional objectives, instructional activities, criteria for assessment, and a timeline. Credit Flex applications are available in the Main Office.

Credit Flex applications for summer and first semester are due the last day of the third quarter. Credit Flex applications for the second semester are due the last day of the first quarter.

COLLEGE CREDIT PLUS (CCP)

WHAT IS COLLEGE CREDIT PLUS:

College Credit Plus (CCP) is designed to help students earn college and high school credits at the same time by taking college courses from community colleges or universities. The purpose of this program is to promote rigorous academic pursuits and to provide a wide variety of options to students in grades 7-12 who meet college admission requirements. As required by law, no fees will be charged to families for College Credit Plus classes taken through public universities.

TIMELINE:

Students and parents are required to inform their school district that they intend to participate in the College Credit Plus program **by April 1** for the following year, by completing and returning the **Intent to Participate** packet.

ADVANTAGES OF CCP FOR STUDENTS:

- Students may earn college credit and high school credit upon successful completion of the course.
- Increase the rigor and challenge of course offerings while in high school.
- Per HB 487, College Credit Plus courses must receive the equivalent weight as any weighted course within a given content area.
- Course tuition at public colleges/universities paid for by Beavercreek City Schools. Students choosing to enroll in a participating private college or university may incur limited costs.

ELIGIBILITY:

- In order to participate in CCP students must meet requirements established by each college/university.
- To register for a class students must meet the prerequisite requirements outlined by the university or college in which they are attending.
- A student must provide his/her own transportation if taking courses on the college campus.

SCHEDULING:

- Students taking College Credit Plus courses are subject to the rules and regulations of the university they are currently attending, including add, drop, and enrollment dates.
- Students must schedule a full BHS schedule prior to registering for college classes. The class schedule may be adjusted, as necessary, but not without cause. Students must have a schedule that equals full-time status.
- Students will not earn credit for college courses at the remedial level.
- BHS is not responsible for any scheduling conflicts between college courses and BHS classes and/or school activities. This includes credits needed prior to BHS commencement exercises.
- **It is your responsibility to make sure driving time is sufficient.**
- Federal financial aid may be impacted: federal guidelines limit the number of courses you may attempt (even if they are taken while in high school) to 150% of the number of credits needed for a degree.
- **It is the responsibility of student/parent to maintain close communication with both their BHS counselor and academic advisor at the university.**

AMOUNT OF WORK/PACE/MATURITY:

- Courses taken on the college campus will be comprised of students of all ages enrolled at the college, not just students enrolled through CCP. While in college courses, students are introduced to a learning environment that promotes an open exchange of ideas. Course content is presented on an adult level and class discussions require a mature understanding of divergent viewpoints and the ability to think critically on controversial issues.

AMOUNT OF WORK/PACE/MAURITY: (CCP continued)

- Students should understand that these courses are college-level courses, and the amount of work, pace, and rigor of content in college courses may be much greater than high school courses. In addition, college course grades become a part of a student's permanent college transcript and are calculated into the college grade point average. **Poor performance in college courses may affect future university admissions and financial aid.**

HIGH SCHOOL GRADUATION REQUIREMENTS:

- No BHS graduation requirements will be waived for any student participating in College Credit Plus but College Credit Plus courses may be used to meet BHS graduation requirements.

FAILURE OR WITHDRAWAL FROM CCP COURSE:

- **If a student fails or withdraws from any college course, the cost for tuition, fees, and books may be charged to the family.**
- No credit is awarded for a failed course.
- No coursework will be given Pass/Fail as a grade.
- If the failed course is a requirement for high school graduation, it must be retaken and completed before graduation.
- Proper paperwork must be filed with the university to withdraw. Upon withdrawal, the student must meet with BHS counselors to develop a new graduation plan and schedule.
- CCP courses and the grades associated with them will be reported on both the student's high school transcript as well as the college transcript.
- Failure to satisfactorily complete a college course for BHS credit may result in (but not be limited to) the following consequences:
 - a. Fees for dropped or failed class will be assessed
 - b. Failure to meet graduation requirements
 - c. Loss of commencement privileges
 - d. Negative effect on GPA and class rank
 - e. Loss of extra-curricular eligibility

ACADEMIC CREDIT (CCP TO BHS):

- A college course earning 3 or more semester hours = 1 BHS credit.
- A college course earning less than 3 semester hours = a proportional fraction of a HS credit.
For Example:
 - 2 semester hour college course = 0.66 credits at BHS.
 - 1 semester hour college course = 0.33 credits at BHS.
- Maximum number of hours allowed per school year in CCP program at college = 30 college hours AND cannot exceed 120 college credit hours over students' career.

WEIGHTED GRADES:

- CCP courses will be awarded the same weight as AP courses, by subject area. If BHS does not offer an AP course in the subject, the CCP course will not be weighted.

EXTRACURRICULAR ACTIVITIES:

- Students who participate in extracurricular activities must still meet eligibility requirements set by the school district and the OHSAA. Students must be enrolled and receive passing grades in courses that earn a minimum of 5 credits per year toward high school graduation. Eligibility is based on the courses taken in the preceding grading period. Students should check with a BHS counselor if they need to remain eligible for OHSAA sports.
- If the student plans on playing a sport in college, CCP courses may not be accepted for NCAA clearing house.

COUNSELING SERVICES:

- An academic advisor from the participating institution is required to meet with each student within the first two weeks of class. This may be done in a group setting.
- College transcripts can be requested by visiting the respective college or university website associated with the courses taken. Beaver Creek High does not have access to college transcripts.
- All BHS students (whether full or part-time) have free access to all BHS counseling services. This includes all academic, personal and post-secondary counseling services.

TRANSFER OF CREDITS/TRANSCRIPTS:

- Credits earned through College Credit Plus are transferable to many public and private institutions in Ohio and out of the state. If a student attends the same college after high school graduation, full credit is transferred.
- Honors Programs may not accept CCP credits.
- CCP credit is not guaranteed at out of state public colleges and private universities.
- Students who want to transfer to another university should send their CCP transcript to the university they plan to attend.
- Two websites are available to help students fully understand what courses will transfer: www.transferology.com or www.ohiomeanssuccess.gov

CCP BOOKS:

- A procedure for the purchasing/renting and returning of textbooks for CCP courses will be provided to participating students. All CCP books purchased by Beaver Creek City Schools are considered the property of the district.

SAMPLE COLLEGE CREDIT PLUS PATHWAYS

- Below are sample College Credit Plus pathways for 15 and 30 credit hours. Students are not limited to this university or these courses.

COURSE	CRN	CREDIT
French 1010	Beginning French	3
English 1100	Academic Reading and Writing	3
Math 1280	College Algebra	3
Chemistry 1010	Intro to Chemistry	3
Sociology 2000	Intro to Sociology	3
Subtotal		15
Second Semester		
French 1020	French II	3
English 2040	Great Books	3
Music 2140	Music in Western Culture	3
History 1010	Western Civilization to 1500	3
Physics 1050	Physics of How Things Work	3
Total		30

COLLEGE CREDIT PLUS COURSES OFFERED AT BHS

Sinclair CCP Courses

**** ALL COURSES MUST MEET ACCUPLACER ELIGIBILITY REQUIREMENTS**

ENGLISH

ENG 1101 – English Composition I – (3 college credit hours)

In English Composition I, students learn reflective, analytical and argumentative writing strategies, incorporating sources and personal experience. Students will negotiate between public and private rhetorical situations and purpose to achieve academic literacy. They will write multiple drafts using a recursive writing process as they work toward fluency in style and mechanics.

Semester / 1 BHS credit

Grades 11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

It is recommended that a student successfully complete both English 9 & 10 before taking this course.

ENG 1201 – English Composition II – (3 college credit hours)

English Composition II, building on the skills in English Composition I, develops rhetorical literacy through research, critical reading and multigenre writing tasks. Through major and minor, cumulative stand-alone assignments, students construct arguments and analyses, ethically incorporating academic sources while developing their own voices as writers and citizens.

Semester / 1 BHS credit

Grades 11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

Prerequisite: ENG 1101

MATHEMATICS

MTH 1470 – College Algebra – (3 college credit hours)

Polynomial, radical, rational, exponential, and logarithmic functions and their graphs; roots of polynomial functions, rational and polynomial inequalities; systems of linear and nonlinear equations; matrices; and applications.

Year / 1 BHS credit

Grades 10-11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

It is recommended that a student successfully complete both Algebra I & Geometry before taking this course.

SCIENCE

BIO 1111 General Biology – (4 college credit hours)

This course is designed as the first in a series of two general education science courses. Covers basic chemistry and biochemistry; cellular and molecular biology.

Year / 1 BHS credit

Grades 11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

It is recommended that a student successfully complete both Biology & Chemistry before taking this course.

BIO 1171 General Biology – (5 college credit hours)

The first course of a two-semester university-parallel sequence for biology science majors. Topics include science method; chemical and biochemical foundations; cell structure, function and reproduction; cellular respiration, photosynthesis, Mendelian genetics, chromosomal genetics, molecular genetics, protein synthesis, gene regulation, genomes, viruses and biotechnology.

Year / 1 BHS credit

Grades 11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

It is recommended that a student successfully complete both Biology & Chemistry before taking this course.

SOCIAL STUDIES

PLS 1120 American Federal Government – (3 college credit hours)

American political system at the national level, including process of government; democratic theory and development of the U. S. Constitution; citizen participation through voting; interest groups and political parties; structure, functions and powers of legislative, executive and judicial branches; issues of civil liberties and equal rights.

Semester / 1 BHS credit

Grades 11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

It is recommended that a student successfully complete both World History & American History before taking this course.

HIS 1111 Western Civilization I – (3 college credit hours)

Major trends in the development of Western culture, emphasizing political, economic, social, and cultural achievements, from prehistory to the seventeenth century.

Semester / 1 BHS credit

Grades 10-11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

It is recommended that a student successfully complete World History before taking this course.

HIS 1112 Western Civilization II – (3 college credit hours)

Major trends in the development of Western culture, emphasizing political, economic, social, and cultural achievements, from seventeenth century to the present.

Semester / 1 BHS credit

Grades 10-11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

It is recommended that a student successfully complete World History before taking this course.

WORLD LANGUAGE

SPN 1101 Elementary Spanish I – (4 college credit hours)

Foundation for understanding, speaking, reading and writing Spanish. Work outside of class and/or in the language laboratory is required.

Year / 1 BHS credit

Grades 9-10-11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Placement by Sinclair Community College

It is recommended that a student successfully complete Spanish I before taking this course.

SPN 1102 – Elementary Spanish II – (4 college credit hours)

Foundation for understanding, speaking, reading, and writing Spanish. Work outside of class and/or in the language laboratory is required.

Year / 1 BHS credit

Grades 10-11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Prerequisite: SPN 1101

SPN 2201 Intermediate Spanish I – (3 college credit hours)

Reviews and extends basic principles through composition and conversation, stressing fluency. Work outside of class and/or in the language laboratory is required.

Year / 1 BHS credit

Grades 11-12

This course receives weighted grading of 5.0 on a 4.0 scale

Prerequisite: SPN 1102

SPN 2202 Intermediate Spanish II – (3 college credit hours)

Reviews and extends basic principles through composition and conversation, stressing fluency. Work outside of class and/or in the language laboratory is required.

Year / 1 BHS credit

Grade12

This course receives weighted grading of 5.0 on a 4.0 scale

Prerequisite: SPN 2201

ELECTIVES

COM 2206 Interpersonal Communication – (3 college credit hours)

Exploration of the development, maintenance and termination of interpersonal relationships. The focus is on effective verbal and nonverbal interactions between two people, highlighting methods of initiating and maintaining effective communication with, and understanding of, others through learning and applying interpersonal communication theory.

Semester / 1 BHS credit

Grades 9-10-11-12

This course receives weighted grading of 4.0 on a 4.0 scale

Placement by Sinclair Community college

SUMMER SCHOOL

Summer school will consist of remedial work for students who have failed classes. Remedial or make-up work will usually be offered in the following areas:

- English
- Math
- Social Studies
- Science

***PE will not be offered in Summer School.**

VALEDICTORIAN/SALUTATORIAN ELIGIBILITY

- For a student to be eligible for Salutatorian or Valedictorian status at Beavercreek High School, the student must have enrolled at Beavercreek High School and been awarded grades and credits by Beavercreek High School during the entire 7th semester.
- The Valedictorian and Salutatorian selection will be made at the conclusion of the 7th semester. Selection will be based on grade point averages using the final grades for all courses receiving high school credit. The final grade point average will be rounded to the nearest tenth.
- Student taking courses under the provisions of the “College Credit Plus” program should be aware that courses taken at the university level also count in calculation of the grade point average and class rank.
- School policy regarding students moving into our district and calculating their grade point average shall be: only those advanced level and honors courses, which are weighted, and equivalent to those existing in Beavercreek’s curriculum will be used in calculating a student’s grade point average and determining the rank in class. Any other advanced level and honors courses appearing on the transcript that have no equivalent course in the Beavercreek curriculum will be calculated using the four point grading scale. The transcript will show all courses that were designated advanced courses by the previous school.

NATIONAL HONOR SOCIETY

The National Honor Society promotes recognition for students who reflect outstanding accomplishments in the areas of Scholarship, Character, Leadership, and Service.

ELIGIBILITY:

To be eligible for membership, the candidate must be a member of the JUNIOR class and must have attended at Beavercreek High School/Greene County Career Center the equivalent of one semester. Even though a student was selected for membership at another school, it is important to note that a student must meet the requirements of the Beavercreek High School chapter.

SELECTION PROCESS:

Students' academic records will be reviewed after the first semester of junior year to determine scholastic eligibility. A **3.6 GPA** is required. There will be no rounding.

Students who are eligible scholastically will be notified by March 1. At that time, students will be given instructions for completing the mandatory **Student Activity Form**. It is very important for the student to carefully read and follow the instructions on the form. No consideration will be given to a student's form that is improperly completed.

The Student Activity Form must be submitted to the NHS advisor by the date stated on the form. Forms will not be accepted after the designated date.

The NHS advisor and the Faculty Council will submit a list of names of all those students who returned their Student Activity Form to all faculty members. The faculty will be asked to comment on the candidates' leadership in the classroom and on the candidates' observable character.

The Student Activity Form, the input acquired via the Faculty Information Sheet, along with other verifiable information (letters verifying community service), will be reviewed by the Faculty Council. The Faculty Council will, according to pre-determined criteria, award a numerical value to each of the four main categories.

Scholarship: A student who demonstrates outstanding scholarship will receive:

- (5) for a 4.0 to 4.6 GPA
- (4) for a 3.6 to 3.9 GPA

Leadership: A student who demonstrates outstanding leadership will:

- exhibit leadership in the classroom
- demonstrate reliability and dependability
- uphold principals of morality and ethics

Character: A student who demonstrates outstanding character is one who:

- is respectful, reliable, dependable, and honest.

Service: A student who demonstrates outstanding service is one who:

- volunteers dependable and well-organized assistance to his/her community, church and school.
- All school volunteer service must be done outside of the school day and cannot be the required or fundraising activity of any co-curricular activity or sports team.
- Volunteer hours should be accumulated each year from the beginning of freshman year to present. Students should begin compiling documentation early.

NHS SELECTION PROCESS (continued)

- Letters of verification of hours and type of service volunteered must be provided.
- In order to receive the maximum amount of points, service hours should be from a variety of types of service (i.e. church, Scouts, hospital, etc.)

WHO IS CHOSEN?

The Faculty Council will award points from (1) to (5) for leadership, character, and service, and a (4) to (5) for scholarship. **An average of 4.0 is required for selection.** There will be no rounding.

GRADUATION REQUIREMENTS: HONORS DIPLOMA

Students must fulfill 7 of the following 8 criteria

Subject	Criteria
English Language Arts	4 units
Mathematics	4 units, including Algebra I, Geometry, Algebra II or equivalent and another higher-level course <u>or</u> a four-year sequence of courses that contain equivalent content.
Science	4 units, including Chemistry and Physics
Social Studies	4 units
World Language	3 units, including at least 2 units in each language studied
Fine Arts	1 unit
Grade Point Average	3.5 on a 4.0 scale
ACT/SAT Score (excluding scores from the writing sections)*	27 ACT / 1280 SAT

Gifted Services for High School Students at Beaver Creek City Schools

Gifted students have many opportunities to have their unique learning needs met at Beaver Creek City Schools through advanced/honors, Advanced Placement, Dual Enrollment, and specialized elective courses. Below is a table that explains which classes provide gifted service. A student who is identified as gifted in Superior Cognitive Abilities or Creative Thinking may be challenged through any of the courses listed.

Gifted Identification Area	Advanced/Honors Courses	AP Courses	Specialized Elective Courses	Dual Enrollment (on-campus) CCP Courses*
Math	Scholarship Geometry Honors Geometry Scholarship Algebra II Honors Algebra II Scholarship Precalculus Honors Precalculus Scholarship Calculus	AP Calculus AB AP Calculus BC AP Statistics		College Algebra 1170
Reading/Writing	Scholarship English 10 Honors English 10 Scholarship English 11 Scholarship English 12	AP Language & Composition AP English Literature & Composition	Scholarship Composition	English 1101 English 1201
Science	Scholarship Biology Scholarship Chemistry Honors Chemistry Scholarship Physics Honors Physics	AP Biology AP Chemistry AP Physics	Human Anatomy & Physiology	Biology 1111 or 1171
Social Studies	Honors US History	AP US History AP Government AP World History AP European History AP Psychology	Design Thinking 301	History 1111 History 1112 PSL -1120
Visual/Performing Arts		AP Studio Art	Art II Photography II Art Portfolio Advanced Acting Beaver Creek Chorale Women's Choir Varsity Band Concert Band Symphonic Band Wind Symphony	
				Spanish 1101 Spanish 1102 Spanish 2201 Spanish 2202 Communication 2206

Gifted students in grades 7-12 who are interested in coursework that is not provided at the high school can also take courses through College Credit Plus. These courses, if they match a student's area of identification, are also considered gifted service.

*On-campus CCP course offerings are dependent on enrollment and staffing criteria.

CLASS PLANNING CHART

	Freshman Grade 9	Sophomore Grade 10	Junior Grade 11	Senior Grade 12
English Language Arts 4 credits required				
Math 4 credits required				
Science 3 credits required				
Social Studies 4 credits required				
Health ½ credit required Phys. Ed. ½ credit required And/or elective				
Fine Arts 1 credit required				
Electives 5 credits required: Art, Business, Foreign World Language, Family & Consumer Science, Industrial Tech, Core Area electives				

ART

Students are required to earn one credit in Fine Arts. All of BHS art courses count as Fine Arts credit. Students planning to study art during and after high school should take Art A & B, Art II, Portfolio and as many other art courses as possible.

<u>LEVEL I COURSES</u>	<u>GRADE</u>	<u>CREDIT</u>
Art A	9-10-11-12	½
Art B	9-10-11-12	½
Computer Arts I	10-11-12	½
Drawing	9-10-11-12	½
Arts, Crafts, and Appreciation	9-10-11-12	½
 <u>LEVEL II COURSES – Prerequisite: Art I</u>		
Art II	10-11-12	1
Ceramics & Sculpture I	10-11-12	½
Computer Arts II	10-11-12	½
Painting	10-11-12	½
Photography I	10-11-12	½
Photography II	10-11-12	½
Printmaking	10-11-12	½
 <u>LEVEL III COURSES</u>		
Art Portfolio	11-12	1
AP Studio Art	12	1

LEVEL I

Art One A

This course is an introduction to the fundamentals of art where students will learn to apply the elements and principles of design. The emphasis will be on drawing, painting, design and art history.

*In order to take Art II, you MUST take Art 1-A and Art 1-B.

Semester / ½ credit Fee - \$22 Grades 9-10-11-12

Art One B

This course is an introduction to the fundamentals of art where students will learn to apply the elements and principals of design. The emphasis will be on sculpture, ceramics, printmaking, design and art history.

*In order to take Art 2, you MUST take Art 1-A and Art 1-B.

Semester / ½ credit Fee - \$22 Grades 9-10-11-12

Computer Arts I

This course introduces students to computer art in various formats. The students will explore digital photography, computer graphic design, and digital animation and will apply elements and principles to their work. Students will use a variety of computer programs. Emphasis will be on both technical skills and creative art-making. *This course is the prerequisite for Computer Arts II.*

Semester / ½ credit Fee - \$25 Grades 10-11-12

Drawing

This course is for students who like to draw or would like to learn how. A variety of media will be used, including pencil, colored pencil, pen and ink, charcoal, scratchboard, and pastels. Subject matter will include still-life, figures, portraits, landscape, and more.

Semester / ½ credit Fee - \$25 Grades 9-10-11-12

Arts, Crafts, and Appreciation

This course combines art history and the creation of related crafts. The course content is introduced through digital images, videos, lectures, and supporting art projects.

Semester / ½ credit

Fee - \$25

Grades 9-10-11-12

LEVEL II

Art II

This course reinforces the fundamentals of art. Students will briefly review Art I concepts and skills before learning new content. The focus for this course will be learning the traditional means for using the different materials. Students will be encouraged to become more expressive and creative in their work. Career opportunities in Art will be explored. **This class is a pre-requisite for Level 3 art courses.**

Year / 1 credit

Fee - \$50

Grades 10-11-12

Prerequisite: "C" average in Art I or Art A and Art B

Ceramics and Sculpture I

This course combines the areas of ceramics and sculpture in the creation of 3-dimensional works of art from clay and various media. Students will learn to use hand-building, modeling techniques, and the potter's wheel.

Semester / ½ credit

Fee - \$25

Grades 10-11-12

Prerequisite: Art A or Art B

Computer Arts II

This course involves the creation of art using a computer and image editing software, such as Adobe Photoshop and Illustrator. Students will learn to apply the elements and principles of design to their work. They will be introduced to graphics tablets, scanners, and digital cameras.

Semester / ½ credit

Fee - \$25

Grades 10-11-12

Prerequisite: Computer Arts I

Painting

This course is for students who would like to improve their painting skills. The curriculum includes both basic and advanced painting skills. A variety of media is used, including watercolors, acrylics and oils. Subject matter includes still-life, figures, portraits, landscapes and more. Students are encouraged to create larger works.

Semester / ½ credit

Fee - \$25

Grades 10-11-12

Prerequisite - Art A

Photography I

This course is an introduction to 35 mm film cameras and digital photography with DSLR cameras. Emphasis is on camera mechanics, film developing, darkroom printing, digital processing with Adobe programs, and design. Students will learn about the history of photography and alternative photo processes. It is recommended that students have a personal 35mm SLR, manual film camera. There are a limited number of film cameras that can be loaned out. It is recommended that students have a personal Digital Camera. Please make sure it is at least 5 megapixels. There are no digital cameras available for check out. (All digital photo projects can be done during class time using the digital cameras owned by BHS.) It is recommended that students have a personal SD card and flash drive, but they are not required.

Semester / ½ credit

Fee - \$30

Grades 10-11-12

Prerequisite: Art A

Photography II

This course continues with more advanced photo and printing techniques learned in Photography I. Students will use 35 mm film cameras and DSLR cameras. Emphasis is on camera mechanics, film developing, darkroom printing, digital processing with Adobe programs and design. Students will study the work of famous photographers, careers in photography, and alternative photo processes.

Photography II (continued)

It is recommended that students have a personal 35mm SLR, manual film camera. There are a limited number of film cameras that can be loaned out. It is recommended that students have a personal Digital Camera. Please make sure it is at least 5 megapixels. There are no digital cameras available for check out. (All digital photo projects can be done during class time using the digital cameras owned by BHS.) It is recommended that students have a personal SD card and flash drive, but they are not required.

Semester / ½ credit

Fee - \$30

Grades 10-11-12

Prerequisite: Photography I

Printmaking

This course involves the creation of a variety of printmaking techniques such as, but not limited to, monotypes, mono-prints, on color reduction prints, three color reduction prints, etching and calligraphy.

Semester / ½ credit

Fee - \$25

Grades 10-11-12

Prerequisite: Art A

LEVEL III

Art Portfolio

This course is extremely important for students who plan to pursue art after high school. The course is designed to help students create and compile a portfolio with a minimum of 12 pieces of quality artwork that can be presented for college admittance, scholarships, art competitions or employment. Art career information will be shared with students. College representatives from various art schools will give presentations during class. It is recommended that every student have a flash drive used to manage a personal digital portfolio during the year.

Year / 1 credit

Fee - \$50

Grades 11-12

Prerequisite: Art II

AP Studio Art

This course focuses on preparing an individual, 24 piece portfolio for submission to the College Board the first week in May. The score awarded determines college credit. AP credit will be given on BHS transcripts. The demands of this course are similar to a first year college level class with an emphasis on quality craftsmanship, critique, and independent work. Most work must be 2 dimensional such as drawing, collage, photography, fashion design, digital imaging, graphic design, printmaking, weaving, illustration, etc. Students must demonstrate understanding of the Principles and Elements of Art. Students may submit 12 pieces of artwork from previous art classes or work done on their own. At least 12 artworks will be new and created as a series with consistent theme or concentration. All work must be original, no plagiarism is accepted. There is an AP Exam fee.

Year / 1 credit

Fee - \$50, plus AP Exam Fee

Grade 11-12

Prerequisites: Art I & Art II or Art I, Photography I and II (if submitting photography only portfolio)

AND 12 2D artworks submitted to the Art Department no later than March 1st, Art Department recommendation will be deciding factor for acceptance into course.

Introductory Personal Keyboarding

This course is designed to develop proper touch keyboarding technique and basic formatting skills for business and personal documents. Students work to expand skills in speed and accuracy. Introductory Personal Keyboarding utilizes Micro Type, a typing program, and Microsoft Word. This course is an excellent complement to Computer Applications or Desktop Publishing. [This course is not recommended for students who currently type more than 25 words per minute.]

Semester / ½ credit

Fee - \$20

Grades 9-10-11-12

Computer Applications: Office

This course is designed for students who are interested in studying productivity and presentation software using Microsoft Office (Word, Excel, PowerPoint, and Google Docs/Apps). Students will progress through beginning and intermediate features of each software. Simulations and projects will be utilized as teaching and learning tools. By the end of the semester, students should be able to apply Word, Excel and PowerPoint features in documents. Basic keyboarding knowledge is essential.

Semester / ½ credit

Fee - \$20

Grades 9-10-11-12

Accounting

Accounting establishes a foundation for understanding business, and provides initial knowledge needed for an accounting career. This class introduces the principles and process involved in double-entry accounting systems. It covers the entire accounting cycle including the use of journals, ledgers, worksheets, financial statements and specialized accounting functions such as banking and payroll. This class is recommended for anyone interested in pursuing a career in business and/or accounting. Learning can also be transferred to apply to personal situations in everyday life, including topics such as checking accounts, payroll, expenses, income, profit and net loss. Microsoft Excel will be utilized for projects and stimulations.

Year / 1 credit

Fee - \$35

Grades 10-11-12

Computerized Employment Opportunities (CEO)

CEO is a business foundations course designed to acquaint students to the role and purpose of business in our economic system, with emphasis on what everyone should know to function effectively as a consumer, a worker, and a citizen. This introductory business course is taught in a computer lab setting, where learning MS Office (Word, Excel, PowerPoint, and Publisher) features is a focus. Furthermore, this course will also: (a) serves as a background for other business courses you may take in high school and college, (b) assist you with consumer decision making and many aspects of personal finance, (c) prepare you for future employment, and (d) help you

CEO (continued)

effectively perform your responsibilities as a citizen. Overall, the course gives students a broad exposure to business operations and is a solid background for additional business courses.

Year / 1 credit

Fee - \$20

Grades 10-11-12

Desktop Publishing

Desktop Publishing is a project-based course that will allow students to do hands-on projects such as T-shirt designs, book jackets, digital scrapbooks, laminated bookmarkers, magazine covers and marketing items. Students will create original layouts of various publications including the illustration of music/poetry/literary works. Desktop Publishing is an introductory course in InDesign that will acquaint students with graphic design techniques, principles of page layout and design, and desktop publishing terminology and applications.

Semester / ½ credit

Fee - \$20

Grades 10-11-12

Entrepreneurship

This course is designed to teach students key information necessary to start and maintain a business. Students will study the characteristics of successful entrepreneurs, self-employment, and basic economic concepts related to small businesses, such as competition and production. This course will also walk students through the steps of setting up a business, including developing a business plan, a webpage, a mission and a vision, attracting investors, and marketing a company.

Semester / ½ credit

Fee - \$20

Grades 10-11-12

Personal Finance

This course will start students on a path toward being in control of their financial futures. Students will learn how to budget, save, spend wisely, avoid debt, and give. A thorough understanding of financial concepts will enable students to leave this course with applicable and useful skills for life. This course studies the personal financial needs of most individuals and emphasizes the basic of college and career planning, budgeting, saving, checking, investments, credit, the wise use of insurance, paying and preparing income tax returns and more. Students taking this course will learn to better prepare for their financial futures.

Semester / ½ credit

Fee - No

Grades 10-11-12

Business and Personal Law

Through the study of authentic current events situations and past case law, this course will study business and personal law as it applies to all individuals, not just those interested in a legal career. From the foundations of law through the modern-day problems of identity theft, issues covered are almost endless. Topics include business ethics, criminal and civil law, the court system, contract laws, consumer protection, property and business-ownership rights, employment law, credit and debt issues, and more. Don't miss out on the opportunity to prepare your way for a successful personal and business life.

Semester / ½ credit

Fee - No

Grades 11-12

International Business & Management

This course introduces students to business, sales, and supervision practices. Students will also be introduced to the international business environment, trade theories, the basics of international monetary and political systems, and the effects of legal, political, and cultural forces on the global economy.

Semester / ½ credit

Fee - No

Grades 11-12

Sports and Entertainment Marketing

If you are interested in the exciting areas of sports and entertainment, this course is the place to learn how marketing strategies are formulated, implemented, and evaluated in that context. The fascinating world of sports and entertainment offers a new perspective to the traditional world of marketing. This course will explore (but not be limited to) professional, college and amateur sports, public image and endorsements, entertainment on stage or screen, promotional planning and advertising, product development, and legal issues. Students will develop critical thinking, decision making, and communication skills through individual and group project work while exploring the world of sports and entertainment.

Semester / ½ credit

Fee - No

Grades 11-12

Yearbook

The high school yearbook, *Beaver Tales*, is an intensive project completed by a selected staff of 14-18 students. Responsible for all creative aspects of the yearbook, *Beaver Tales* staff members design, write, edit, photograph, and distribute the book. Students with an interest in computer design, photography, and writing are encouraged to apply. Application packets are made available prior to registration typically in late January. Students must go through the application, interview, and recommendation process to become a part of the staff. It is recommended that *Beaver Tales* staff members have their own digital camera, 10 MP minimum.

Year / 1 credit

Grade 12

ADVANCED PLACEMENT

Students can take either AP course in the 11th or 12th grade. Students who intend to take both classes need to begin with AP Language in 11th grade and continue with AP Literature in 12th grade.

JUNIOR AND SENIOR ADVANCED PLACEMENT COURSE OPTIONS:

AP Language and Composition

This course will prepare students for the Advanced Placement English Language and Composition Exam. A summer reading/writing assignment will be given to each student who enrolls in AP English and must be turned in on the first day of school. This course will strengthen the effectiveness of your writing through close reading and frequent practice at applying rhetorical strategies, analyzing information from source texts, and writing arguments. You will become a critical reader of predominantly nonfiction works, and time periods. Along with the course requirements, the expectation is that all students will self-study and take the AP Exam. This course is an intensive study of rhetoric and writing at the college level.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - No

Grades 11-12

AP English Literature and Composition

This course will prepare students for the Advanced Placement English Literature and Composition Exam. A summer reading/writing assignment will be given to each student who enrolls in AP English. Students will be expected to read perceptively, to participate actively in class discussions, and to write analytically. Along with the course requirements, the expectation is that all students will self-study and take the AP Exam. This course is an intensive study of literature and writing at the college level.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - No

Grades 11-12

Elective English Courses

English elective courses allow students to improve skills in reading, writing, public speaking and other ELA-related areas. Unless otherwise noted, all elective courses are one semester in length and count as 1/2 elective credit.

Scholarship Composition

In this course, students write essays appropriate to particular audiences. In their essays, students develop an expository thesis and argument, as well as two or more sub-points in support of that thesis, and present different forms of evidence from personal experience, research and reading. Students write essays over the semester to master a variety of rhetorical modes such as narrative-descriptive, comparison-contrast, cause-effect, and analysis. In all of their essays, students learn to write appropriate introductions and write appropriate conclusions and apply different organizational strategies. Students will use transitional devices to relate paragraphs and revise their essays to eliminate irrelevant and redundant development. Students will develop a range of sentence forms and learn to vary their sentence structures and levels of diction for different occasions and audiences. Students will master mechanics, usage, and MLA format.

This course receives weighted grading of 4.5 on a 4.0 scale.

Semester / ½ elective credit Fee - No

Grades 10-11-12

ACT/SAT Prep

This course is recommended for college-bound students planning to take the SAT and/or ACT. Taking this course will prepare students for all of the question types found on the SAT and ACT reading and language sections. We will analyze each of the test question areas and give special consideration to verbal refreshers and techniques aimed at relieving test-taking anxiety. Topics include sentence completions and reading comprehension for the reading section, grammar, and essay writing for the writing section. Through review and practice, students will be familiarized with the directions for each section, the style of question, and the best approaches for finding the answers. For the Writing sections, subdivided into multiple-choice sections and a short, persuasive essay, we will study the directions, style, and approach to the questions, as well as work on composing the essay.

Semester / ½ elective credit Fee - No

Grades 10-11-12

Acting

This course is open to any student interested in learning and developing theatrical performance skills. Physical and mental preparation, pantomime, vocal techniques, improvisational theatrical movement, and character interpretation will be studied and practiced. Students will select, cut, memorize, block, rehearse, and perform both solo and duet pieces. The historical foundations of theatre will also be studied.

This course can be used as a fine arts credit.

Semester / ½ elective credit Fee - No

Grades 9-10-11-12

Advanced Acting

This course is designed for those students who have a strong interest in theatre. Many of the skills studied in Acting I will be further explored as students continue to perform solo and duet pieces. Theatre history, technical theatre, and playwriting will also be studied.

This course can be used as fine arts credit.

Semester / ½ elective credit Fee - No

Grades 9-10-11-12

Prerequisite: Acting

Creative Writing

A multi-genre introduction to the craft of creative writing, this course will explore various topics and media including (but not limited to) comedy, nonfiction, graphic novels, mystery, horror, science fiction, poetry, and screenplays. Students will take notes, read examples in class, and provide thoughtful analysis of their own writing as well as their peers. No writing experience is needed and all levels of writers are welcome.

Semester / ½ elective credit Fee - No

Grades 9-10-11-12

Journalism I

Explore all areas of journalism: print, television, radio, public relations, and internet. This course will feature sports writing, feature writing, news writing, and online journalism. Students enrolled in this course will have the opportunity to submit work for possible publication in the school newspaper, *The Beacon*, and for publication on the school district website and social media platforms.

- Students must complete an application before scheduling this course.
- The course must be taken either before or at the same time as Journalism II.

Applications are available on Mrs. Russ's school website:

Semester / ½ elective credit Fee - No

Grades 9-10-11-12

Journalism II (formerly Newspaper Production)

Students will apply the skills they learned in Journalism I to the production of the school newspaper, *The Beacon*, and to the production of work for possible publication on the school district website and social media platforms. Students must apply to become a member of the newspaper staff and must have completed Journalism I the year before or during the same year as they take Journalism II. Applications are available on Mrs. Russ's school website.

Year / 1 elective credit

Fee - No

Grades 10-11-12

Public Communication in Media I

This course is a semester-long class that introduces students to the study of public speaking, digital media, mass media, and popular culture through a hands-on approach to media interactions and video production. Specific areas of study include public service announcements, such as live streaming school announcements, television advertising, short films, and broadcast news as well as learning the fundamental technical aspects of the digital video camera, camera shots and composition, media literacy, aesthetic elements and techniques. Course includes writing and speaking for radio, television, and live stream internet and techniques of camera use and editing as well as sampling the visual artistry of the media.

Semester / ½ elective credit Fee - No

Grades 9-10-11-12

Advance Public Communication in Media

A continuation of the in Public Communications and Production I curriculum with specific focus on directing, media presentation, and project management. Application required.

Prerequisite: Speech or Public Communications and Production I

Semester / ½ elective credit Fee - No

Grades 9-10-11-12

Film as Literature

The purpose of this class would be to have students critically study film as we would study literature while we explore film techniques and editing. A major component of this class would be analysis in both written argument and discussion, as well as comparison of literary adaptations to films. This course would be geared towards the student who is interested in film not for mere enjoyment but to hone critical thinking and analytical skills that would transfer to the English class and literary analysis.

Semester / ½ elective credit Fee - No

Grades 10-11-12

WORLD LANGUAGE

The study of world languages presents students with the opportunity to learn their chosen language through a combination of reading, writing, listening, and speaking. Students learn and reinforce their language skills by actively participating in cultural and role-playing activities. Students will use authentic materials and reenact typical situations in the target language. Tapes, CD's, videos, workbooks, and supplemental texts are used in the classes to create an enjoyable and effective learning environment.

- A student must have a "C" average with teacher recommendation to continue to the next level.
- Students are required to purchase supplemental course materials for some courses.
- Online resources and activities are available for all levels of French, German, and Spanish.

<u>COURSES</u>	<u>GRADE</u>	<u>CREDIT</u>

Sign Language I	10-11-12	1
Sign Language II	11-12	1

LEVEL I - French, German, Spanish

This course consists of the basic skills of reading writing, listening, speaking in the target language, and study of the culture. Students will be presented with typical daily life situations to practice grammar, vocabulary, pronunciation, and conversational skills.

Year / 1 credit Fee – cost of materials Grades 9-10-11-12

LEVEL II - French, German, Spanish

This course continues to stress the four basic skills of reading, writing, listening, and speaking to guide the student toward proficiency. The study of the culture of countries speaking the target language will continue. Students will read longer selections and compose longer compositions.

Year / 1 credit Fee – cost of materials Grades 9-10-11-12

Prerequisite: Level I with teacher recommendation

LEVEL III - Scholarship French, German, Spanish

This course is a refinement of skills learned in Levels I and II with in-depth study of grammar, vocabulary, literature and idiomatic expressions. The students will participate in increased conversational activities, compose more complex writing, and increase cultural knowledge of countries where the target language is spoken. Students will transition to literature and culture content taught in the target language to increase their proficiency in listening, speaking, reading, and writing.

This course receives weighted grading of 4.5 on a 4.0 scale.

Year / 1 credit Fee – cost of materials Grades 10-11-12

Prerequisite: Level II with teacher recommendation

LEVEL IV – Honors French, German, Spanish

In the fourth year, students do advanced work based on the foundation obtained during years I – III. Literature and culture content are taught in the target language as students enhance their proficiency in listening, speaking, reading, and writing.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee – cost of materials

Grades 10-11-12

Prerequisite: Level III with teacher recommendation

Advanced Placement (AP) French, German & Spanish V

The course is based on the criteria outlined in the Advanced Placement Course Description for French, German and Spanish language. Through conversation, composition, and study of modern literature and culture, students “develop language skills that are useful in themselves and that can be applied to various activities and disciplines rather than to the mastery of any specific subject matter.” The emphasis is on active communication. A major objective of the course is to prepare students to take the AP Exam given in May.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee – cost of materials

Grade 12

Prerequisite: Honors Level IV with teacher recommendation

American Sign Language I

This course consists of basic vocabulary, expressive and receptive skills, appropriate grammar and a study of Deaf Culture. Students will be able to distinguish the differences between American Sign Language and English, demonstrate conversational skills, and recognize the Deaf Community as having its own distinct culture with its own history and language.

Year / 1 credit

Fee – cost of materials

Grades 10-11-12

American Sign Language II

This course is a continuation of Sign Language I. Students will continue to learn conversational vocabulary, increase expressive and receptive skills, and improve finger spelling skills. There will be more focus on sentence structure, grammar, and classifiers. Students will learn the basics of role shifting and sequencing, as well as other temporal aspects. There will also be a more in-depth study of American Deaf Culture.

Year / 1 credit

Fee – cost of materials

Grades 11-12

Prerequisite: American Sign Language I with teacher recommendation

INDUSTRIAL TECHNOLOGY

These courses are recommended for students interested in the Engineering field.

<u>COURSES</u>	GRADE	CREDIT
Mechanical Drawing	10-11-12	1
Computer-Aided Drafting (CAD)	11-12	1
Electricity	10-11-12	1
Woodworking I	10-11-12	½

Mechanical Drawing

This drafting course will introduce students to different areas in drafting and design. Areas explored include mechanical, engineering, and architectural drawings. Course content will stress graphic visualization and will develop the student's technical imagination.

Students will need to purchase their own drafting equipment in addition to the class fee.

Year / 1 credit Fee - \$30 Grades 10-11-12

Computer-Aided Drafting (CAD)

This course is intended to introduce students to the fundamentals and applications of drafting and design with the aid of a computer. With the CAD software, the student will complete various degrees of drafting and design problems. Basic knowledge of traditional drafting is needed. Seniors will be given first preference.

Year / 1 credit Fee - \$30 Grades 11-12

Prerequisite: Mechanical Drawing

Electricity

This course will introduce the student to basic components, simple circuits, the behavior and characteristics of electron flow in radios, motors, appliances, and in general use of everyday living. This procedure is accomplished by lecture, laboratory, and use of simple motors.

Year / 1 credit Fee - \$35 Grades 10-11-12

Woodworking I

This course, through lecture and laboratory experiences, will provide the student an opportunity to develop skills in design, planning, and layout. Students will develop skills in the use of hand tools and equipment, using a student-selected product as a vehicle for learning. Students must pass a safety test and are required to complete a project.

Semester / ½ credit Fee - \$35 Grades 10-11-12

Calculator Information:

Some math courses require graphing calculators, as listed in the course description. We recommend a **TI-84** or a **TI-Nspire** (non-CAS version). The TI84 Plus CE or the TI-Nspire CX are the newest versions, but older versions will be fine. If students have a different graphing calculator, it may work, but their teacher may not necessarily provide instruction in how to use it. A CAS (Computer Algebra System) should not be purchased, as it will not typically be allowed on tests.

While there are various graphing utilities available for devices, these will not be permitted for use on tests; a handheld graphing calculator is still required. If students have any questions or difficulty obtaining a graphing calculator, they should contact their math teacher or the math department chair.

Algebra 1B

This course includes a continuation of Algebra topics and will introduce the ideas of systems of linear equations, quadratic and exponential functions.

Year / 1 credit

Grades 9-10

Prerequisite: Algebra 1A

Algebra I

This course provides mastery of algebra skills including operations with real numbers simplifying algebraic expressions, solving linear equations and inequalities, solving quadratic equations, solving systems of linear equations, simplifying radicals, operating with polynomials, and factoring polynomials. Students need counselor placement only.

Year / 1 credit

Grade 9

Geometry

Geometry is the branch of mathematics concerned with the measurements and relations of planar figures (segments, lines, angles, polygons, circles) and solids (rectangular solids, pyramids, cylinders, cones, spheres). The content also includes the development of deductive reasoning and an introduction to basic trigonometry. A scientific calculator is recommended.

Year / 1 credit

Grades 9-10-11

Prerequisite: Algebra I or Algebra 1B

Scholarship Geometry

Scholarship Geometry is offered to any student who desires to take a course of broader scope than the traditional Geometry offering. The first semester will emphasize writing proofs while the second semester will emphasize computational processes. This course will consist of the study of elements of geometry, angles, perpendicular lines, parallel lines and planes, congruent triangles, similar polygons, right triangles, circles, area, volume, and coordinate geometry. A scientific calculator is required for this course. Students should expect at least $\frac{1}{2}$ hour of homework each night.

This course receives weighted grading of 4.5 on a 4.0 scale.

Year / 1 credit

Grades 9-10

Prerequisite: "A" in Algebra I

Algebra II

This course is a continuation of the study of algebra. The content includes the concepts from Algebra I, polynomials, negative and rational exponents, complex numbers, relations and functions, and an introduction to trigonometry. A scientific calculator is recommended for this course.

Year / 1 credit

Grades 10-11-12

Prerequisite: Geometry or Informal Geometry

Scholarship Algebra II

This course consists of sequences of real numbers, linear functions and relations, systems of linear open sentences, polynomials and rational algebraic expressions, radicals, irrationals, quadratic equations, polynomial functions and complex numbers, exponents and numerical computation, quadratic relations and systems, logarithms, and trigonometric and circular functions. A specific graphing calculator is required. Please see the math department web site or ask a math teacher for details.

This course receives weighted grading of 4.5 on a 4.0 scale.

Year / 1 credit

Grades 10-11

Prerequisite: Scholarship Geometry

Honors Algebra II

This course consists of sequences of real numbers, linear functions and relations, systems of linear open sentences, polynomials and rational algebraic expressions, radicals, irrationals, quadratic equations, polynomial functions and complex numbers, exponents and numerical computation, quadratic relations and systems, logarithms, conics, trigonometric and circular functions, and trigonometric identities and formulas. A specific graphing calculator is required. Please see the math department web site or ask a math teacher for details.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Grade 10

Prerequisite: Honors Geometry

Precalculus

The course is a continuation of the study of algebra, and it is designed to prepare the college-bound student for college level mathematics. The content includes skills from Algebra II, logarithms, sequences, series, binomial expansion, trigonometry, and an introduction to calculus. A specific graphing calculator is required. Please see the math department web site or ask a math teacher for details.

Year / 1 credit

Grades 11-12

Prerequisite: "B" or better in Algebra II

Scholarship Precalculus

The course is a continuation of the study of algebra, and it is designed to prepare the college-bound student for college level mathematics. The content includes skills from Scholarship Algebra II, conics, polar graphing, vectors, logarithms, sequences, series, binomial expansion, matrices, trigonometry, and an introduction to calculus. A specific graphing calculator is required. Please see the math department web site or ask a math teacher for details.

This course receives weighted grading of 4.5 on a 4.0 scale.

Year / 1 credit

Grades 11-12

Prerequisite: Scholarship Algebra II

Honors Precalculus

The course is a continuation of the study of algebra, and it is designed to prepare the college-bound student for college level mathematics. The content includes skills from Honors Algebra II, logarithmic functions, inequalities, matrices, sequences and series, mathematical induction, complex numbers, the binomial theorem, graphing, conics, limits and basic differentiation. Trigonometry topics include triangles, radian measures, identities and trigonometric equations, graphing inverse functions, complex numbers, and vectors. A specific graphing calculator is required. Please see the math department web site or ask a math teacher for details.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Grade 11

Prerequisite: Honors Algebra II

Scholarship Calculus

This course is designed to prepare the college-bound student for college level calculus. The class focuses on limits, derivatives, and integrals, which are the main themes for the first semester college calculus course. A specific graphing calculator is required. Please see the math department web site or as a math teacher for details.

This course receives weighted grading of 4.5 on a 4.0 scale.

Year / 1 credit

Grade 12

Prerequisite: Scholarship Precalculus

Advanced Placement Calculus (AB)

This yearlong course is designed to prepare students for the AB level AP calculus exam. It is equivalent to one year of college calculus. This course covers limits, derivatives, integrals, differential equations, and their applications. Students are expected to take the AB level AP Calculus exam in May. A specific graphing calculator is required. Please see the math department web site or ask a math teacher for details.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Grade 12

Prerequisite: Honors Pre-Calculus

Advanced Placement Calculus (BC)

This is a rigorous yearlong course that is designed to prepare students for the BC level AP Calculus exam. It is equivalent to one year of college calculus. This course covers all of the AB Calculus curriculum along with additional topics such as improper integrals, parametric and polar equations, and series. Students are expected to take the BC level AP Calculus exam in May. A specific graphing calculator is required.

This course receives weighted grading of 5.0 on a 4.0 scale

Year / 1 credit

Grade 12

Prerequisite: Honors Precalculus

Advanced Placement Statistics

This course will include the study of graphical and numerical analysis of data and patterns, experimental design, probability distributions, and statistical inference. The class will have a largely “hands on” approach, emphasizing the learning of statistical and experimental methods through real-world projects and computer simulations. Each student is expected to take the AP Statistics exam in May. A specific graphing calculator is required. Please see the math department web site or ask a math teacher for details.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Grades 11-12

Prerequisite: Students enrolling for AP Statistics must fit one of the following requirements:

- 1. Previously earned credit for Precalculus.**
- 2. Previously earned credit for Scholarship or Honors Algebra II and be concurrently enrolled in a Precalculus course.**
- 3. Students may not drop Precalculus without first dropping AP Statistics.**

Introductory Statistics

This course is offered as an alternative to a traditional 4th year math course. This introductory study of probability and statistics will provide a thorough overview of statistics, without the same rigor as AP Statistics. Topics will include probability, normal distributions, binomial distributions, sampling and experimentation, and estimation. Emphasis is placed on practical applications. A scientific calculator (TI-30 or equivalent) is recommended for this course.

1 Semester / ½ credit

Grades 11-12

Prerequisite: Algebra II

Discrete Math

This course is offered as an alternative to a traditional 4th year math course. This introductory survey of discrete math includes topics such as logic, sets, cryptography, place systems, prime numbers, Fibonacci numbers, graph theory, voting and apportionment, Pascal's triangle, and modular arithmetic. Emphasis is placed on practical applications. A scientific calculator (TI-30 or equivalent) is recommended for this course.

1 Semester / ½ credit

Grades 11-12

Prerequisite: Algebra II

Transition to College Algebra

This course is offered as an alternative to a traditional 4th year math course. This course will reinforce topics typically covered in a College Algebra class including systems, rational expressions and equations, exponential functions, and radical expressions and equations. A scientific calculator (TI-30 or equivalent) is recommended for this course.

1 Semester / ½ credit

Grades 11-12

Prerequisite: Algebra II

Math Applications

This course is offered as an alternative to a traditional 4th year math course. Students will explore applications of mathematical concepts to real world areas such as forensics, sports, music, art, finance, health and wellness, puzzles and games, computer programming, and social media. A scientific calculator (TI-30 or equivalent) is recommended for this course.

1 Semester / ½ credit

Grades 11-12

PERFORMING ENSEMBLES – VOCAL

Treble Choir

Treble Choir is a performance group dedicated to a variety of vocal repertoire. It is open to all 9th - 10th grade students who have an interest in choral music and performance. Students continue mastery of vocal production, music literacy, and voice-part independence skills. Concert and popular music literature, both sacred and secular, of medium to advanced difficulty is performed. Mandatory public performances include Cabaret, holiday, winter and spring concerts, and O.M.E.A. District and State contests. Students are required to attend any evening and/or after school rehearsals scheduled by the director. Participation in 2 fundraisers is required. A vocal audition is required prior to enrollment in this class.

Year / 1 credit

Grade 9-10

Prerequisite: Audition

Concert Choir

Concert Choir is a mixed performance group dedicated to a variety of vocal repertoire. This course is open to all 9th - 12th graders who have an interest in choral music and performance. Students continue mastery of vocal production, music literacy, and voice-part independence skills. Concert and popular music literature, both sacred and secular, of medium to advanced difficulty is performed. Mandatory public performances include Cabaret, holiday, winter and spring concerts, and O.M.E.A. District and State Contests. Students are required to attend any evening and/or after school rehearsals scheduled by the director. Participation in 2 fundraisers is required. A vocal audition is required prior to enrollment in this class.

Year / 1 credit

Grades 9-10-11-12

Prerequisite: Audition

Beavercreek Chorale

Beavercreek Chorale is a mixed performing group open to students in grades 11 - 12 who have formal choral experience and a basic knowledge of music theory. Members of this advanced chorus are enrolled by audition only and must be willing to put in the time and effort it takes to rehearse and perform difficult music. Instruction will be in music theory and required solfeggio reading (sight-singing). Each day, students work on music theory and concert music. Activities in this class revolve around quality repertoire in many diverse styles of choral literature that are appropriate in difficulty and range for advanced students. Students will master vocal production, music reading and part independence skills. Concert and popular music literature, both sacred and secular, of advanced is performed. Sight-singing, reading music notation, learning good skills for listening to choral music, healthy vocal technique, and self-evaluation and concert performances make up the content and grade of the course. Students must be willing to sing actively each day and will be expected to learn music chosen by the director. Mandatory performances include regularly scheduled concerts, such as Cabaret, holiday, winter and spring concerts and graduation. This choir will also perform at District and State O.M.E.A. contests each year and other concerts as required by the director. Participation in 2 fundraisers is required. A vocal audition is required prior to being enrolled in this class.

Year / 1 credit

Grades 11-12

Prerequisite: Audition unless waived by the director and prior choral experience.

Women's Choir

Women's Choir is the most advanced vocal ensemble offering. Women's choir produces and performs at least 4 concerts annually and consists of a girls-only ensemble. In addition, the group makes guest appearances for many community events and fundraisers. This select vocal course has limited enrollment based upon the need for specific vocal parts; the need may vary year to year. Extensive knowledge of music theory is required. Instruction will be in advanced music theory and required solfeggio reading (sight-singing). Students are vocally challenged through advanced level of singing and complex harmonies from choral music from Medieval Period up to Twentieth Century atonal compositions. Students will work on music theory and sight-singing daily. Mandatory performances include regularly scheduled concerts, such as holiday, winter and spring concerts, O.M.E.A. District and State Contests, graduation and other concerts, as required by the director. Students are required to attend any evening and/or after school rehearsals scheduled by the director. Participation in 2 fundraisers is required. A vocal audition is required prior to enrollment in this course.

Year / 1 credit

Grades 10-11-12

Prerequisite: Audition, Limited

PERFORMING ENSEMBLES – INSTRUMENTAL

Varsity Band

Varsity Band is a select band that offers the entry-level high school instrumental music student a variety of opportunities in musical performance. Performing the finest of band literature from rock to classical, this ensemble performs in a series of concerts throughout the year. This ensemble also participates in O.M.E.A. events. Students are graded on their daily class work and recorded musical tests. They are also expected to keep a points log of outside musical experiences. Students earn points for activities such as outside school performances, concerts, lessons, or attending or viewing any musical activity.

Year / 1 credit

Grades 9-10-11-12

Prerequisite: Director permission and placement audition is needed for entry into this ensemble.

Concert Band

Concert band is a select band that offers the intermediate level high school instrumental music student a variety of opportunities in musical performance. Performing the finest band literature from rock to classical, this ensemble performs in a series of concerts throughout the year. This ensemble also participates in O.M.E.A. events. Students are graded on their daily class work and recorded musical tests. They are also expected to keep a points log of outside musical experiences. Students earn points for activities such as outside school performances, concerts, lessons, or attending or viewing any musical activity.

Year / 1 credit

Grades 9-10-11-12

Prerequisite: Director permission and placement audition is needed for entry into this ensemble.

Symphonic Band

Wind Symphony is a select band that offers the most advanced level high school instrumental music student a variety of opportunities in musical performance. Performing the finest band literature from rock to classical, this ensemble performs in a series of concerts throughout the year. This ensemble also participates in O.M.E.A. events. Students are graded on their daily class work and recorded musical tests. They are also expected to keep a points log of outside musical experiences. Students earn points for activities such as outside school performances, concerts, lessons, or attending or viewing any musical activity.

Year / 1 credit

Grades 9-10-11-12

Prerequisite: Director permission and a placement audition is needed for entry into this ensemble.

Wind Symphony

Wind Symphony is a select band that offers the most advanced level high school instrumental music student a variety of opportunities in musical performance. Performing the finest band literature from rock to classical, This ensemble also participates in O.M.E.A. events. Students are graded on their daily class work and recorded musical tests. They are also expected to keep a log of outside musical experiences. Students earn points for

Wind Symphony (continued)

activities such as outside school performances, concerts, lessons, or attending or viewing musical activity.

Year / 1 credit

Grades 9-10-11-12

Prerequisite: Director permission and placement audition is needed for entry into this ensemble.

****All music courses have fees that are charged through Beaver Creek Music Parents Association (BMPA) for uniform, music and costume cleaning.***

PHYSICAL EDUCATION

Each physical education class is one semester. Students must take a minimum of two different classes to obtain their physical education credit for graduation.

Health

This course includes material that will help students mature physically, mentally, and socially. Physically, students will learn through the study of body systems, diseases, nutrition, and physical fitness. Mentally and socially, students will learn through the study of personality development, the growing process, human sexuality, and learning to recognize and solve problems of living. The course also includes a study of chemical dependency, community health, communicable diseases, major health problems, consumer health, environmental health, and health careers. **Health is a semester class that is required by the state of Ohio for graduation.** The course is recommended to be taken during the freshman year.

Semester / ½ credit

Grades 10-11-12

Fitness

Fitness is a part of all physical education courses. Students will have the skills and knowledge necessary to develop their own personal physical activity program. Students will assess personal fitness in terms of cardiovascular endurance, muscular strength and endurance, flexibility and body composition. Realistic, but challenging, individual goals will be established and a program will be designed to meet identified goals. Students will be expected to actively participate in a variety of fitness activities, which may include running, strength building, stretching, determining body fat percentage, and demonstrating proper technique during exercise.

LEVEL II

Outdoor Education

Students will participate in outdoor activities which may include biking, hiking, canoeing/kayaking, skiing/snowboarding, bowling, frisbee golf, outdoor adventure activities, geocaching, and wilderness safety and survival. The class focus will be cooperative learning, outdoor adventure, and outdoor skill improvement. Field Trips may require additional fees.

Student must provide a working bicycle and helmet. No dirt bikes permitted.

Semester / ¼ credit

Fee - \$25

Grades 10-11-12

Team Sports

Students will actively participate in a variety of team/individual sports (such as table tennis, bowling, football, basketball, team handball, soccer, angleball, ultimate football). The class focus will be sport activities, sportsmanship, team building, and game-skill improvement. Field Trips may require additional fees.

Semester / ¼ credit

Fee - \$25

Grades 10-11-12

Lifetime/Recreational Activities

Students will actively participate in a variety of lifetime and recreational activities (such as volleyball, volley tennis, tennis, badminton, Frisbee gold, bowling, corn hole, mat ball). The class focus will be lifetime activities, sportsmanship, and game-skill improvement. Field Trips may require additional fees.

Semester / ¼ credit

Fee - \$25

Grades 10-11-12

Weight Training

Students will develop a strength or sport specific training plan and gain knowledge of safe weight room practices and proper lifting technique. The class focus will be improving muscular strength, agility and muscular endurance. Field Trips may require additional fees.

Semester / ¼ credit

Fee - \$5

Grades 10-11-12

LEVEL III

Sports Medicine

Students will gain knowledge and experience in athletic training, as well as injury prevention, evaluation and rehabilitation of athletic injuries. The class focus will be first aid and basic anatomy and physiology of the human body. Field Trips may require additional fees.

Semester / ¼ credit

Fee - \$5

Grades 11-12

Prerequisite: You must have Level I & Level II completed to take a Level III class.

PE WAIVER

Beavercreek City Schools has adopted a policy that allows a Physical Education (PE) waiver. The PE waiver rules must follow the Ohio Department of Education (ODE) guidelines. The ODE guidelines exempt students who participate in interscholastic athletics, marching band or cheerleading for two full seasons from the physical education requirements. Students must take another course, which cannot be a physical education course, of at least 60 contact hours. Please visit the high school web page for additional information on the Physical Education Waiver.

SCIENCE

All sophomores will enroll in a Biology or Scholarship Biology class unless it was taken as a freshman. Motivated sophomores may take a Biology course while also taking Chemistry, Scholarship Chemistry, Honors Chemistry, or science elective courses. Chemistry courses, Physics courses, and AP courses are available to juniors and seniors. The lab fees listed for the various science courses cover the cost of the materials used by individual students. These materials include consumable supplies, laboratory manuals or notebooks, and goggles (freshmen only). **The fee does not cover the breakage of lab equipment. Charges for broken items will be assessed as needed.**

Biology

This course investigates the composition, diversity, complexity and interconnectedness of life on Earth. Topics of study will include heredity, evolution, cellular biology, genetics, biochemistry and ecology to provide a framework to explore the living world, the physical environment and the interactions within and between them. Students engage in inquiry based laboratory work, including dissections of preserved materials, to understand and explain the complexity of organisms.

Year / 1 credit

Fee - \$25

Grade 10

Scholarship Biology

This level of biology is for students who are self-motivated and interested in an in-depth study of life-science topics. The course investigates the composition, diversity, complexity and interconnectedness of life on Earth. Topics of study will include heredity, evolution, cellular biology, genetics, biochemistry and ecology to provide a framework to explore the living world, the physical environment and the interactions within and between them. Students engage in inquiry based laboratory work, including dissections of preserved materials, to understand and explain the complexity of organisms.

This course receives weighted grading of 4.5 on a 4.0 scale.

Year / 1 credit

Fee - \$25

Grade 10

Prerequisites: "B" average in Advanced Physical Science

Advanced Placement (AP) Biology

AP Biology parallels a college-level introductory biology course for science majors. It includes laboratory work and analysis, college-level reading, essay writing, and class discussions. A college textbook and lab manual will be used. This course will further develop previously taught life science concepts. Students must be willing to spend time outside class reading and analyzing concepts. Areas of study include molecular and cellular biology,

Advanced Placement (AP) Biology (continued)

biochemistry, cellular energetics, heredity, molecular genetics, evolution, organism biodiversity, and population biology. This class is designed to prepare students for the AP Biology exam in May.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - \$35

Grades 11-12

Prerequisite: Advanced Biology, Advanced Chemistry or Pre-AP Chemistry, and teacher recommendation

Chemistry

This course will extend chemistry concepts studied in Physical Science before giving a broad overview of the rest of the Chemistry discipline. This course will require fewer math skills as ideas will be covered conceptually where applicable; however, a solid knowledge of basic algebra, percentages, rounding and fractions will be essential.

Year / 1 credit

Fee - \$30

Grades 11-12

Prerequisite: Biology and recommendation from science and math teachers

Co-Requisite: Algebra II or higher math course

Scholarship Chemistry

This course is designed for those who excel in school or have a high ability in math and science. The course will cover the traditional topics of chemistry in more depth than the introductory level and requires individual initiative and self-discipline. Labs focus on quantitative experiments and are a major part of the course.

This course receives weighted grading of 4.5 on a 4.0 scale.

Year / 1 credit

Fee - \$30

Grades 11-12

Prerequisite: Recommendation of both science and math teacher

Co-Requisite: Scholarship Algebra II or higher math course

Honors Chemistry

This course is designed for those who seek an in-depth study of chemistry or are planning to take AP Chemistry. The course will move quickly through introductory material in order to cover the advanced topics necessary for success in the AP course. Labs focus on quantitative experiments and are a major part of the course.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - \$30

Grades 11-12

Prerequisite: Recommendation of science and math teacher

Co-Requisite: Honors Algebra II or higher math course

Advanced Placement (AP) Chemistry

The Advanced Placement Chemistry course is designed to be equivalent to the general chemistry course that might be taken during the first college year. The course builds concepts from Pre-AP Chemistry by emphasizing calculations and mathematical formulation of principles as well as quantitative, inquiry-based laboratory experiments. Students are expected to take the AP Chemistry Exam in May.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - \$30

Grades 11-12

Prerequisite: "B" average in Honors Chemistry or an A average in Scholarship Chemistry

Physics

Physics is a study of matter and energy and the mathematical relationship between matter and energy. Topics that will be studied in this course include: mechanics (vectors, motion, and forces), properties of matter, heat waves, sounds, optics, electricity, and magnetism. Laboratory experiments will be an integral part of this course. Physics is strongly recommended for any student interested in further study of science or engineering.

Year / 1 credit

Fee - \$25

Grades 11-12

Prerequisite: "C" average in Algebra II and recommendation of science and math teachers

Scholarship Physics

Physics is a study of matter and energy and the mathematical relationship between matter and energy. Topics that will be studied in this course include: mechanics (vectors, motion, and forces), properties of matter, heat waves, sounds, optics, electricity, and magnetism. Students are expected to have good algebraic and trigonometric skills to use in problem solving. Laboratory experiments will be an integral part of this course. Physics is strongly recommended for any student interested in further study of science or engineering.

This course receives weighted grading of 4.5 on a 4.0 scale.

Year / 1 credit

Fee - \$25

Grades 11-12

Prerequisite: "B" average in Scholarship Algebra II and recommendation of science and math teachers

Honors Physics

This course will include in-depth study of physics topics including: mechanics (vectors, motion, and forces), properties of matter, thermodynamics, waves, electricity and magnetism. Students are expected to have strong algebraic and trigonometric skills to use in problem solving. Laboratory skills will be emphasized in this course. This course is highly recommended for students planning a career in science, engineering, or medicine. Students successful in Pre-AP Physics will be prepared to take Advanced Placement (AP) Physics or college physics.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - \$25

Grades 11-12

Prerequisite: "B" average in Honors Algebra II and recommendation of science and math teachers

Co-requisite: Honors Pre-Calculus or above

Advanced Placement Physics: Mechanics

Advanced Placement Physics: Electricity and Magnetism

Advanced Placement Physics is a first year, Calculus-based, college level physics course. This course is designed to prepare the student for the Physics level C Advanced Placement Exam in Mechanics and Electricity and Magnetism. The AP Physics level C Examination in Mechanics will be required unless the teacher advises the student otherwise. Although students must be willing to spend time outside class analyzing challenging problems and concepts, there will be additional class time to allow for extra assistance for students. Laboratory work is an essential part of this course.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee: \$35

Grades 11-12

Prerequisite: Advanced Physics or Pre-AP Physics

Co-requisite: Advanced Placement Calculus (BC) (or prior successful completion of AP Calculus BC)

Astronomy

In this course, students will gain an understanding of the scientific study of astronomy and the methods astronomers use to probe the universe. Topics of study include: understanding astronomical calculations, celestial mechanics and moon phases, properties of light, formation of the solar system and stars, as well as space research and travel. There will be optional evening stargazing events available for students.

Semester / ½ credit

Fee - \$10

Grades 10-11-12

Prerequisite: Biology

Forensic Science

This cross-curricular, lab-based course allows students to apply scientific knowledge and methods to establish the facts of criminal cases. This course will integrate concepts from Math, English Language Arts, and Social Studies, along with a variety of sciences, including Biology, Chemistry, Anatomy and Physics. Topics of study include: fingerprints, hair, fibers, blood evidence, DNA analysis, toxicology, forensic entomology, forensic anthropology, document analysis, and ballistics.

Semester / ½ credit

Fee - \$10

Grades 10-11-12

Prerequisite: Biology

Field Biology

This course gives students a rare opportunity to take a science course in the most natural classroom of all -the great outdoors. Using the Ferguson Land Lab and Little Beaver Creek, students will be involved in the identification and ecology of amphibians, birds, fish, insects, mammals, reptiles, trees, and wildflowers. Additionally, students will learn about and experience current ecological issues, bird banding, forest and fish surveys, predator-prey games, wildlife management, orienteering, and other topics.

Semester / ½ credit

Fee - \$5

Grades 10-11-12

Prerequisite: Biology

Marine Sciences

This course investigates the new and growing science of the oceans. Topics of study include: maritime history, formation and destruction of ocean basins, seawater chemistry, and movement through waves, currents, and tides. Students will also explore marine life and their function in various ocean zones. Students may have the opportunity to try SCUBA diving and a field trip to Newport Aquarium. This course requires lab work, dissection, and other hands-on assignments.

Semester / ½ credit

Fee - \$15

Grades 10-11-12

Prerequisite: Biology

Environmental Science

This course will help students explore and understand ecology, patterns and cycles on earth, natural resources, and environmental issues, along with developing an appreciation for nature. Students will utilize books, videos, periodicals, and frequent trips in surrounding habitats to gather data, take measurements, and make observations on how both living and non-living components of the environment interact with each other. Students will discuss and debate current environmental issues.

Semester / ½ credit

Fee - \$10

Grades 10-11-12

Prerequisite: Biology

Human Anatomy & Physiology

Anatomy and Physiology is the study of the human body's structure and function. Throughout this course, students will investigate the human body systems. This class is helpful in preparation for any profession in the medical field. Dissections are integral components of the course.

This course may receive weighted grading of 4.5 on a 4.0 scale upon successful completion of additional requirements.

Year / 1 credit

Fee - \$25

Grades 11-12

Prerequisite: "C" average or better in Biology; suggested Chemistry

Social Studies

Current Events

This survey course will examine the major events that are shaping our world today. Students will research, discuss, and debate how what is happening today will impact what happens tomorrow. Students will gain an understanding and appreciation of geography and its impact on world events.

Semester / ½ credit

Grades 9-10-11-12

Design Thinking 101: Designing for Our Community – An Introduction to Product Design

In this course, students will learn about object design, discover, and solve problems in the school. Students will learn the Design Thinking process, identify problems, develop empathy for users, and then test out solutions through prototyping. This course includes heavy amounts of visual communication, work in collaborative teams, reflective writing, and oral presentation. The course consists of three main projects, each varied in length and complexity. Due to the use of sensitive and expensive tools during the prototyping phase, appropriate conduct is required of all students.

Semester / ½ credit

Grades 9-10-11-12

Design Thinking 201: Design Studio – An Introduction to Designing for Impact

In this course, students will learn and apply a collaborative, hands-on approach to solving problems known as Design Thinking to identify problems and create positive social and environmental impact in our community. In this course, students work in small teams to dive into global and local challenges in a human-centered way. Teams will communicate the impact of their work through visual stories and group presentations, while students individually write reflections throughout the course. The course consists of four to five projects, each varied in length and complexity, including Creative Gym (a review of the Design Thinking mindsets), Impact Challenges, and an online Exposure project. Due to the use of sensitive and expensive tools during the prototyping phase, appropriate conduct is required of all students.

Semester / ½ credit

Grades 9-10-11-12

Design Thinking 301: Advanced Design Studio – Beyond the Body: Rethinking Physical Ability

In this course, students will build on the collaboration and problem solving skills developed in Design Thinking 101 or 201 to explore the line between technology and physical ability. Advanced prototyping methods, including 3D printing will be introduced, and sophisticated methods of user research that will help students

Design Thinking 301: Advanced Design Studio - (continued)

explore social impact problems in their community. The course will consist of four projects, each varied in length and complexity, and the activities are framed to prepare students to design their own projects. Students will begin by addressing mini challenges, learn to define problems and needs through more open-ended challenges, and finally learn how to identify, define, and address problems on their own through student-driven projects. Due to the use of sensitive and expensive tools during the prototyping phase, appropriate conduct is required of all students.

Semester / ½ credit

Grades 10-11-12

Prerequisite: Design 101 or Design 201

Modern U. S. History

This course examines the recent history of the United States of America. Students will examine the political, economic, social, cultural, geographical, and foreign policy history of the United States. This course will begin during the late 19th century with the explosion of industrialization, immigration, and urban development and the challenges these developments posed for the early 20th century. The Progressive Era, World War I, the turbulent 20's, the Great Depression, World War II, the Cold Movement, the modern Civil Rights Movement, and the Vietnam War will also be examined in-depth. Students will have the opportunity to study recent events involving women, minorities, politics, contemporary cultural issues and court cases. Students will be expected to complete projects, written reports, oral presentations, and essays, which assess their understanding of the historical and cultural themes.

Year / 1 credit

Grade 10

AP U.S. History

This course is designed to provide students with the analytical and factual knowledge necessary to think critically about the problems and issues in American History. The course will examine colonization through recent 20th Century U.S. and its interaction with world events from six perspectives: American heritage, world interaction, economics, cultural and ethnic groups, democratic processes and citizenship rights and responsibilities. Students will participate in debates, reading and interpreting primary sources. Students will utilize higher level thinking skills and connect American History to relevant current events. Students should possess a strong foundation in reading, writing and critical thinking skills, as the workload of this course is extensive and demanding. Students will be evaluated on their ability to write free responses and document-based essays as well as critical book reviews. Students are expected to take the Advanced Placement test in May.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - \$21

Grade 10

Prerequisite: Honors World History

American Icons and Legends: 1900 - present

The history of our world has been shaped by the words, beliefs, and actions of individuals. Through an in-depth study of these people we can better understand the political, social, and economic impact they had on civilization and their legacy on future generations. This course will be project-based and the students will work together to choose the icons and legends to be studied for the semester. Study will be on categories of individuals, including Rebels and Resisters, Outlaws, Artists, Pop Icons, Empire-Builders, Symbols/ Companies, and First Women.

Semester / ½ credit

Grades 10-11-12

Introduction to Psychology

This course introduces students to the study of psychology. The course will expose students to the historical beginnings of psychology and its effects on society today. Units on founders, theories of development, personality, memory, learning, the human brain, fields of psychology, and perception provide students comprehensive view of psychology. Research methods of modern psychologist and pertinent experiments will be explored and discussed. This course uses hands-on approaches.

Semester / ½ credit

Grades 10-11-12

Introduction to Sociology

This course introduces students to Sociology, which is the study of human social behavior, groups and organizations, and society. Students will learn how to use the sociological perspective in examining individuals'

Introduction to Sociology (continued)

lives and social experiences. Students will learn that many aspects of life are influenced by the social world in which we live. The key component of this course is to study ourselves as individuals and the society that influences our behavior.

Semester / ½ credit

Grades 10-11-12

Sports in Society

This course examines sports as a key aspect American society, culture, and customs. By studying the major themes, events and people that have made up the American sports experience, students will gain a deeper understanding of society, the struggles that have been overcome, and the hurdles still facing the nation.

Semester / ½ credit

Grades 10-11-12

America's Wars

This course will take a closer look at American military conflicts from early settlement to present day. America's involvement in war has had significant political, social, and economic effects not only on the United States, but on the world as a whole. This course will delve further into tactics and leaders of battles. The focus will be on less known conflicts: French and Indian War, War of 1812, Mexican American War, Spanish American War, WWI, Korea, Vietnam, and Desert Storm. This course will study the inter-relationships of warfare, technology, and society in American history. Students will examine the evolution of weapons and tactics over the years. The impact of military technology and the changing military on the home front will also be studied in this course.

Semester / ½ credit

Grades 10-11-12

History Through Film

This course is a study of film and how it depicts trends, issues, and other various events throughout history. In this course, students will use film, literature, primary, and secondary sources to understand and evaluate political, social and cultural movements that have shaped history. In addition to viewing films, students will be expected to complete readings on assigned topics and multiple writing activities. Students will develop skills such as identifying bias, evaluating information presented in multiple formats, presenting information informally, and writing and defending their position(s). Students will build on their knowledge of history to focus on a deeper content analysis.

Semester / ½ credit

Grades 10-11-12

Contemporary Issues

In this course, students will learn about contemporary issues and events affecting the United States using the following themes: Civil rights and reform movements, societal trends, and foreign and domestic policy. The class will examine the historical roots of events that have had an impact on our society over the last fifty years, analyze the causes of the events covered within the themes, and evaluate challenges and institutions which exist today. Students will be expected to complete projects, written reports, oral presentations and essays that assess their understanding of the historical and cultural themes.

Semester / ½ credit

Fee - \$12

Grades 11-12

Law and Society

This semester course will serve as an introductory course to the law and legal systems in the United States. The main focus of the course will be on Criminal Law, School and Juvenile Law, Consumer Law and Family Law. Mock trials, case studies, simulations and other activities will be used to allow students to explore the definition of law, citizen rights and responsibilities under the law.

Semester / ½ credit

Grades 11-12

Government Principles and Practices

This course will encourage all students to become active participants in the democratic process. This course will assess the procedures of the legislative, executive and judicial branches within the federal system of government and explore alternative solutions to questions presented. Students will also examine key documents, which form

Government Principles and Practices (continued)

the basis for the United States of America. This course adheres to criteria set forth in Ohio's Learning Standards and prepares students for requires states assessments.

Semester / 1/2

Grade 12 *

*** With administration recommendation**

Government and Politics

This year long, current event focused course will assess the procedures of the legislative, executive and judicial branches within our federal system of government. The role of political parties, interest groups, the media, elections, and political officials' accountability to the public will be analyzed. This course covers all areas of political theory, foreign policy, and political history. Student debates, discussion groups, government simulations, field observations, guest speakers, and various technology tools may be used. Examination of key documents, which form the basis for the United States of America, will also be a focus of the course. Students are expected to critically evaluate all materials and explore alternative solutions to questions presented. This course adheres to criteria set forth in Ohio's Learning Standards and prepares students for required state assessments.

Year / 1 credit

Grades 11

AP Government

This AP course will provide students with the analytical skills and factual knowledge necessary to critically assess problems and materials in US government and political science. This course will assess the procedures of the legislative, executive, and judicial branches within our federal system of government. The role of political parties, interest groups, the media, elections, and political officials' accountability will be analyzed. Economic forces and their impact on government decisions will be explored. This course covers all areas of political theory, foreign policy, and political history. Students will assess political materials, their relevance to a given political problem, their reliability, and their importance. Advanced reading comprehension and critical thinking skills are necessary for the outside reading assignments that encompass a large part of the course. It is expected that each student will take the AP Government exam in May.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - \$20

Grades 11-12

AP World History

This AP course will present the highlights of a world historical approach to the past. The time frame of the course is from 8000 B.C.E. to the present day. Major civilizations from East Asia, South Asia, the Middle East, the Mediterranean, Sub-Saharan Africa, Europe, Russia and the Americas will be surveyed. Five main themes will be studied: Interaction between humans and the environment; development and interaction of cultures; state building; expansion and conflict; economic systems; and the development and change in social structures. Upon completion of this course, students will be prepared to take the AP World History exam in May.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - \$21

Grades 11-12

Prerequisite: "B" average in Scholarship English and a "B" average in Honors or AP U.S. History

AP European History

In this course, students will think conceptually about European History from 1450 to the present time and apply analytical thinking skills as they learn about the past. Five themes provide areas of historical inquiry for investigation throughout the course: Interaction of Europe and the world; poverty and prosperity; objective knowledge and subjective visions; states and other institutions of power; and individuals and society. Students will be expected to reason about continuity and change over time and make comparisons between historical developments in different times and places. At the conclusion of this course, students will be prepared to take the AP European History exam in May.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

Fee - \$21

Grades 11-12

Prerequisite: "B" average in Scholarship English and a "B" average in Honors or AP U.S. History

AP Psychology

This AP course will introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. Students will learn about the ethics and methods psychologists use in their science and practice. This course will address the following topics: History and approaches; research methods; biological basis of behavior; sensation and perception; states of consciousness; learning; cognition; motivation and emotion; developmental psychology; personality; testing and individual differences; abnormal behavior and its treatment; and social psychology. This course will prepare the students to take the AP Psychology exam in May.

This course receives weighted grading of 5.0 on a 4.0 scale.

Year / 1 credit

AFJROTC – Aerospace Science I

The objectives of AFJROTC are to educate and train high school cadets in citizenship, promote community service, instill responsibility, character, and self-discipline, and provide instruction in air and space fundamentals. The AFJROTC program is grounded in the Air Force core values of integrity first, service before self, and excellence in all we do. The curriculum emphasizes the Air Force heritage and traditions, the development of flight, applied flight sciences, military aerospace policies, leadership education, military drill and ceremony, citizenship, and space exploration.

This is the first Aerospace Science course for all new cadets. It is an aviation history course focusing on the development of flight throughout the centuries, beginning with ancient civilizations, then progresses through time to modern day. Leadership education and wellnews introduces cadets to the AFJROTC program, providing a basis for progression through the rest of the AFJROTC program while instilling elements of good citizenship.

Year / 1 credit

Fee - \$25

Grades 9-10-11-12

Introduction to Engineering Design – Project Lead the Way

Engineers make a world of difference! Students are introduced to the engineering design process, applying math, science, and engineering standards to identify and design solutions to a variety of real problems. They work both individually and in collaborative teams to develop and document design solutions using engineering notebooks and 3D modeling software. Are you ready to design the future? This class is held at Ferguson Hall.

The focus of Engineering Design is the application of the engineering design process. Topics include work-processes, optimization methods, design optimization, and risk management tools. Students will use 2D and 3D modeling software to help them design solutions to solve proposed problems, document their work, and communicate solutions. Additionally, students will interpret industry prints, and create working drawings from functional models. Emphasis is given to experimental problem solving in real systems.

Year / 1 credit

TBA

Grades 9-10-11-12

Peer Listening

Peer Listening trains students in problem solving and listening skills. Students in this course will be able to provide other students with a systematic approach to decision-making and problem solving.

Year / 1 credit

Grades 11-12

Prerequisite: Application to and selection by instructor

Student Council

Student Council serves as a voice for the student body and a service organization for the school. Members participate in a wide variety of activities, including leadership training workshops, advisory councils, and special projects. Student Council strives to be a positive influence in improving Beaver Creek High School and its environment. The class meets one period each day, is led by five elected officers and has a limited number of students. Selection to Student Council is based on school citizenship and a student's potential to contribute to the student body. Membership is by selection from those who register; it is not an elected office for the regular members. Students may register for the fall or spring semester.

Semester / No Credit

Grades 9-10-11-12

Media Center/Information Center

Aides perform tasks such as typing, filing, errands, and assisting students and staff find and check out materials. Computer lab aides help students and staff utilize software. The aides perform a valuable service to the school and use the experience to obtain jobs at the local public library and cinemas.

Semester / No Credit

Grades 10-11-12

Prerequisite: Application and selection by library staff

Office Aide

Office aides run errands and assist office staff.

Semester / No Credit

Grades 10-11-12

Prerequisite: Must meet attendance requirements/selection by office personnel

Peer Helper

Peer Helpers serve many functions in special education classrooms. Peer Helpers assist teachers with individual, small and large group activities, and provide positive role modeling for students with disabilities. Two options are available: academic setting or adaptive physical education.

Semester / No Credit

Career Based Intervention (CBI)

In this co-op program, junior students learn successful work habits and attitudes. CBI work experience includes opportunities in a variety of jobs. Students must be accepted into this program.

Year / 4 credits

Grade 11

Career Based Intervention (CBI - GCCC)

In this co-op program, senior students learn successful work habits and attitudes. CBI work experience includes opportunities in a variety of jobs. *This is a Greene County Career Center program housed at Beaver Creek High School.* Students must be accepted into this program.

Year / 5 credits

Grade 12

Marketing Education (GCCC)

This course has two components. Component one covers basic business organization for the distribution of goods and services, career opportunities in business, training in retail career skills, and the development of personal-social traits, which are essential for successful employment. In component two, students work part-time for pay. Students receive on-the-job training through supervised work experience. Students enrolled in this course will be excused from school after they have completed their in-school schedule. Students are responsible for their own transportation to and from work. Sinclair Community College will award twelve hours of credit to Beaver Creek High School graduates who complete this program. *This is a Greene County Career Center program housed at Beaver Creek High School.*

Year / 5 credits

Grade 12

GREENE COUNTY CAREER CENTER (GCCC)

The Greene County Career Center provides students two-year career preparation and tech prep programs. The primary purpose of the career preparation programs is to prepare students to enter an ever-changing technical work force. Many GCCC graduates continue their education at post-secondary institutions. GCCC students must meet BHS graduation requirements. Extracurricular activities and graduation take place at or with Beaver Creek High School. There are no tuition charges to students other than fees necessary to cover program toolkits, protective clothing, and club fees.

Student admission in some GCCC programs is quite competitive. In programs that fill rapidly, admission is based upon past attendance, grade point average, and related coursework completed. The guidance counselors have information regarding enrollment procedures, program descriptions, and employment opportunities for students desiring job training at the Greene County Career Center.

In compliance with Title VI, IX, and Section 504 Regulations, the Greene County Career Center dedicates itself to providing equal admission opportunities to all people regardless of race, color, national origin, sex, or handicap.
